About us

01 ABOUT US

On June 28, 1996, National Environmental Trainers published the first online EH&S course (HAZWOPER 8 hour annual refresher) for commercial use. At that time no other web-based training course existed.

Today, we are the industry leader in OSHA compliant courseware.

We are a nationally renowned training firm that specializes in online environmental, health and safety (EH&S) training for Fortune 50 companies, federal and state regulators, medium to small companies, the federal government and individual professionals. This includes training officials from OSHA, EPA, DOD, DOE, NASA, USCG, U.S. Fish and Wildlife Service, Department of Homeland Security and many other regulatory agencies. In addition, we have also been fortunate enough to train thousands of professionals across every industry in the private sector.

In 1996, we were the first to offer online EH&S training. We became the pioneers of online training by offering the first interactive self-paced online course and the first major online learning site.

Our success in the marketplace is clear. We are the largest private training provider of HAZWOPER and HAZMAT training in the United States. Because of our clients, we are the premiere EH&S training company in the nation. The name "National Environmental Trainers" (NET) is the most recognized name in the EH&S training industry. Compliance officials including regulatory agencies see our certificates on a daily basis.

National Environmental Trainers

National Environmental Trainers® (NET) offers the highest quality available in online HAZWOPER refresher and 40 Hour HAZWOPER Training and certification. We are specialists and experts with many years experience in this field. Our site contains a comprehensive catalog of OSHA courses for online safety training. We have trained thousands of professionals with our courses, including state and federal regulators. If you are looking for an OSHA compliance source that provides excellent education along with tremendous service for safety training, you are in the right place. We also offer OSHA 40 courses, Resources Conservation and Recovery Act (RCRA), DOT and environmental training. We have in-house subject matter experts who authored these courses and are available 24/7 to answer questions or provide guidance. Because HAZWOPER work is considered to be one of America's most hazardous occupations, you can feel comfortable knowing that subject matter experts help explain the fundamentals in clear terms.

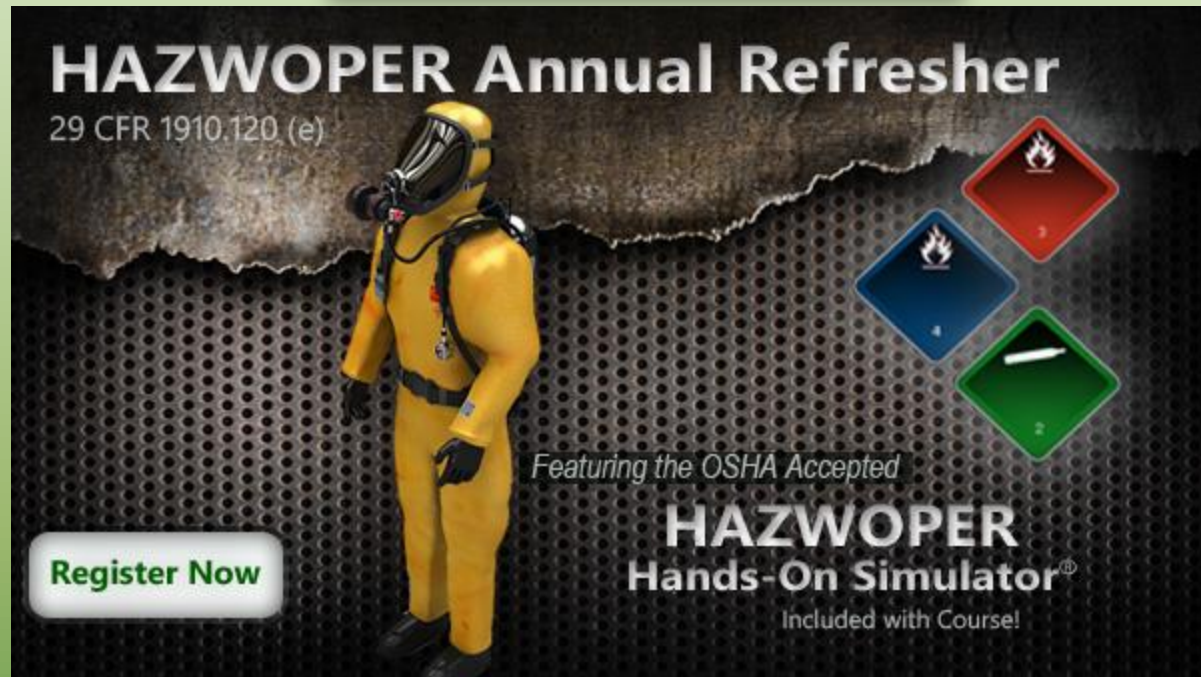

At NET, we are the original provider of online HAZWOPER certification, HAZMAT certification and 40 hour HAZWOPER training. In 1996, we published the first online refresher course on the Internet. Today, we are the leading course provider. Contact us for more information about our classes on RCRA training, DOT training and OSHA compliance.

40 Hour HAZWOPER

Take the web's premiere 40 hour HAZWOPER course - featuring the OSHA accepted HAZWOPER Hands-on Simulator. Group discounts available (3 or more people). Price Match Guarantee. We will match a competitors price for the same course even though the quality of the course may be vastly different. The price match is only valid for companies who offer OSHA compliant HAZWOPER training. (Recently, OSHA has revoked the Outreach Training authorization from some companies). Are you receiving credible training? You may find less expensive online courses but they cannot fulfill the OSHA 40 Hour HAZWOPER hands-on requirement without a simulator or other means. We are the only company today with an OSHA accepted online simulator. Course includes Free Study Guide! **Buy today with confidence!**

8 Hour HAZWOPER

The HAZWOPER refresher course is now offered in 2 great formats (Classic and Enhanced). The Classic format is the format we have used over the years. The Enhanced format incorporates many of the latest online training components. Note: The Enhanced version requires a Broadband internet connection. **Includes Free** Competing HAZWOPER refresher online must be OSHA compliant and same quality course. Included in the course is our exclusive HAZWOPER Hands-on Simulator which OSHA has accepted.
